patients prefer
Nu Radiance
teeth whitening
products

The **ONLY** professional teeth whitener that re-mineralizes with calcium peroxide and whitens without causing sensitivity!

Why offer any other whitener to your patients when
FORTE whitens and strengthens the enamel?

- ~ 27% Carbamide Peroxide with Calcium Re-mineralization Paste
- Short 30 minute wear-time or 1 hour for additional calcium benefit
- 4ml Automix Syringe (5-6 complete treatments per syringe)
- Reduced sensitivity
- Exceptional results in as little as 5-8 days!
- 18 month shelf life (refrigerate for long term stability)
- Promotes the re-mineralization and re-calcification of teeth during the whitening process*
- Treats post-ortho (bracket treatment) "white spots"
- Re-calcifies incipient lesions to clinically significant depths (100 microns) and improves the surface hardness of the enamel*
- Pleasant peppermint flavor
- Patented formula
- ONLY dentist dispensed

“Finally! I can recommend, with confidence to my patients with white spots and decalcification, a product that whitens and remineralizes. Forte delivers dramatic results that surpassed all expectations.”

— Dr. Bill Holohan, Holohan Dental Professionals
