

Root ZX[®] II – Endodontic Predictability Apex Locator with Low Speed Handpiece

J.MORITA MFG.CORP.

Thinking ahead. Focused on life.

Root ZX II Key Features

Endodontic Predictability

As the world's best selling apex locator, Root ZX II is renowned for its accuracy and dependability.

Low Speed Handpiece Option

By attaching a module to the Root ZX II Apex Locator, the dentist can prepare canals using the Low Speed Handpiece.

Root ZX II Features at a Glance

Root ZX II – Apex Locator

Continuous, Accurate Measurement

Root ZX II accurately and precisely locates the position of the file inside the root canal.

No Zero-Adjustment

It is not necessary to set the device on zero before measuring each individual canal.

Automatic Calibration

Automatic calibration ensures accuracy and eliminates the effect of changes in temperature, moisture, etc. inside the canal even during treatment.

Low Speed Handpiece Module – Canal Preparation Instrument

Prepare Canals While Simultaneously Taking Measurements Accurate and precise preparation of the root canal.

Motor Flexibility: 8 Speed Settings

150, 200, 250, 300, 400, 500, 600, 800 rpm

5 Automatic Safety Functions

Auto Motor Start/Stop Auto Torque Reverse Auto Torque Slow Down Auto Apical Reverse Auto Apical Slow Down

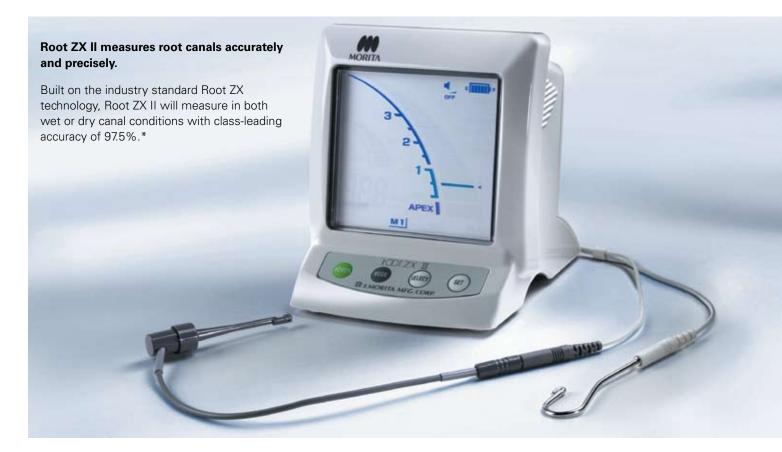

Fully Programmable Settings

Root ZX II is equipped with 3 programmable memory modes.

Compact and Lightweight Handpiece Design

The Low Speed Handpiece features complete ergonomic design with ideal angles for maximum balance and access to the oral cavity.

Root ZX II – Apex Locator World's Best Selling Unit

Accurate Measurement

The ratio technique used in the instrument provides a highly accurate detection of the file's location. The accuracy of the measurement is not affected by the presence or absence of blood, other discharges, electrolytes, saline, tap water, or hydrogen peroxide.

No Zero-Adjustment

It is not necessary to set the device on zero before measuring each individual canal.

Automatic Calibration

Automatic calibration ensures accuracy and eliminates the effect of changes in temperature, moisture, etc. inside the canal, even during treatment.

Large Color Liquid Crystal Display (LCD)

The large color LCD screen is easy to read, and provides a clear progressive display with high contrast.

- 1 Large Color LCD
- 2 File Position / Canal Length Indicator Bar
- 3 Adjustable Pre-position Bar/Apical Line
- Green indicators illuminate when the file is approaching the apical constriction

* Independent study, data on file

Low Speed Handpiece Module Canal Preparation Instrument

The Root ZX II with Low Speed Handpiece prepares root canals while displaying precise and accurate measurements of the root canal.

By offering multiple automatic safety controls, the Root ZX II Low Speed Handpiece is the clear choice for today's general dentist or endodontist. It allows you to prepare canals with accuracy and precision, providing the predictability that is expected in today's dental practice. Root ZX II with Low Speed Handpiece - Safety First!

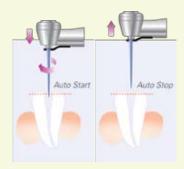

Foot Switch for Easy Operation

When a canal measurement is not possible (or required) the Low Speed Handpiece has an optional foot switch. This enables the operator to use Root ZX II as a standard micromotor. The foot switch is especially useful for preparing the coronal third of the root canal.

5 Automatic Safety Functions:

- Auto Motor Start/Stop
- Auto Torque Reverse
- Auto Torque Slow Down
- Auto Apical Reverse
- Auto Apical Slow Down

No foot switch required **Auto Motor Start and Stop**

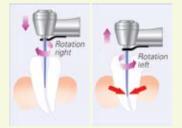

Motor starts when file is inserted and stops when it is withdrawn.

Quick and Easy Handpiece Connection

Simply attach the handpiece option by using the quick connect joint for rotary endodontic preparations.

The Low Speed Handpiece is ergonomically designed to minimize fatigue and fingertip stress. It is lightweight and ideal for endodontic access.

Reduced file breakage **Auto Torque Reverse**

File stops and reverses if the torque goes over the set torque limit. With 11 torque limit options, the Root ZX II Low Speed Handpiece is ideal for all today's rotary NiTi file systems.

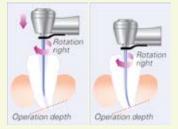

Reduced file breakage Auto Torque Slow Down

File slows down as the torque approaches the set torque limit.

Accurate preparation Auto Apical Reverse

File stops and reverses when it reaches the end of the set working length. You can also set stops manually or adjust the interval between stopping and reversing.

Precise control Auto Apical Slow Down

File slows down as it approaches the end of the set working length, ensuring safe and accurate preparations.

- Weight: only 2.47 oz. (70 g)
- (approx.)Compact head size: only .49" (12.5 mm)
- g) Speed: 150 to 800 rpm with 8 speed options

Thinking ahead. Focused on life.

In 1916, Junichi Morita started to import products of the leading dental equipment manufacturers into Japan, where demands for modern dentistry were growing. His venturesome attempts of supplying selected products for oral healthcare has grown steadily by receiving valuable support and guidance from the dental profession. His enterprising spirit lives through the decades, and all Morita Group Companies join in continuing to pursue marketing, distribution and services, as well as R&D and manufacturing, in collaboration with world leaders in healthcare products and research organizations.
